AI User Installation Guide.

Network Pro

Published date: 19-07-2025

AI Users are the latest registry creation. This registry contains all latest registries belonging to various softwares. It is fully integrated with windows registry for functionality. AI users have the capability of acting as self-controlled system to work with any key being introduced.

This registry is self sufficient to monitor the hexagesimal resemblance with any user present in the device. Thus creating a updated registry in conjunction with the user.

This registry can be injected in any device computer or laptop as required.

Following are the steps to introduce AI User registry in device:-

1. Go to window's start menu
2. In the '**search programs and files**' type '**Regedit**'
3. Open the '**Regedit**' i.e. Registry Editor
4. Click '**File**'menu in the top-left column
5. Choose '**Import**' option
6. Select the AI-User key where you have downloaded it.
7. Press '**Ok**' to complete the step
8. Your key will be downloaded successfully.
